

Gaurav Deshmukh

R&D System Integrator and Process Owner
ASML Netherlands

“SAE club helped me to gain knowledge and understanding of automotive subjects in depth and being a SAE member, I was always aware of the most recent developments in the automotive industry. Further this club was particularly useful for me to experiment and demonstrate leadership skills which was quite an edge during the campus interviews. Finally and most importantly, I could associate with the SAE events like Baja and Supra, which was the biggest learning and a great fun.”

**Sumit Naza**

Master Thesis in Continental
Working in the Pre-development department of Electric powertrain.
Regensburg, Germany.

“Everything that I am doing now has its strings attached to SUPRA, because that's where the journey began and I became passionate about working in Automotive Industry. Shetiye Sir and Bissa Sir's support and guidance has been unparalleled throughout my journey. And because of that only I will soon get an opportunity to work on the development of Modern Electric Vehicles.”

**Shubham Pokle**

Deputy Manager, R&D
Maruti Suzuki India Ltd.

“The SAE Collegiate Club provided me with learning facilities that are comparable to industry leading standards for designing and manufacturing automobiles, imparting knowledge on vehicle designing along with efficiency and safety standards to meet ever-evolving norms. The club aided in grasping the latest research methods, new product development practices, and manufacturing techniques in order to meet the industries' growing needs and emerge as a better professional.”
